Description

Trying to connect() a signal handler for featureAdded I get this error:

    @TypeError: connect() failed between 'featureAdded' and 'unislot'@

My code looks like this:

    vLayer.featureAdded.connect(self.onNodeFeatureAdded)

    ...

    @pyqtSlot(int)
    def onNodeFeatureAdded(featureId):
    ...
    return

I guess that the sip bindings for featureAdded() and featureDeleted() should be changed the same way was done for geometryChanged() and attributeValueChanged() in commit commit:32978fb4e9a6b115bed3245a90c4c038ed3fb04c

i.e:

    void featureAdded(QgsFeatureId fid);
    void featureDeleted(QgsFeatureId fid);

instead of:

    void featureAdded(qint64 fid);
    void featureDeleted(qint64 fid);
