| **Crashes QGIS or corrupts data:** | | **Copied to github as #:** | 10716 |

**Description**

Trying to export my QGIS project as a Mapserver file.
File, Export to Mapserver

Case 1)
Nothing happens. No files are written.

Case 2)
Export dialog box comes up, enter data, click okay.
A brief hourglass, then an error "msexport.exe has caused an error. This progam must now close. Send error report?

Updated to Python 2.5

**History**

**#1 - 2007-03-14 07:03 PM - Gary Sherman**

Is this on Debian? Sounds like a Windows box to me...

**#2 - 2008-03-19 02:53 AM - leolami -**

I think the bug is fixed in QGIS 0.9.2
Can you test it and close it if all is rigth, close it?
Regards Leonardo

*- Resolution set to fixed*
*- Status changed from Open to Closed*

I close it. If you think it is still valid reopen it, please.
