QGIS Application - Bug report #6590
QGIS crashes when opening project where CSV-datatable moved

2012-10-31 07:38 AM - paull -

Status:	Closed		
Priority:	High		
Assignee:			
Category:			
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	invalid
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	15781

Description

Steps to reproduce:

1. Create project

2. Add CSV-Datatable as a layer

3. Save project, close

4. Move CSV-Datatable to different directory

5. Open Project -> QGIS crashes immediately and gives no hint, why so (instead of asking for missing layers/datafiles, as with e.g. shape-file data)

History

#1 - 2012-10-31 08:41 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed

already fixed in master.
