Pull Request or Patch supplied:	Yes	**Resolution:**	fixed	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15800	

Description

The attached patch modifies the buildsystem to either use the bundled Qexterserialport or a system-wide library.

A find-script locates include paths and development library sym-link, much like for Qwtpolar or others. The build flag is WITH_INTERNAL_QEXTSERIALPORT.

Build works with latest Qextserialport 1.2beta2.
