Description

The preview in the field calculator expression builder is often missing. This happens because the expression text is evaluated against the first feature in the layer. If the expression doesn't evaluate for the first feature there will be no text.

Thanks Nathan for the explanation.

Not sure the best way to handle this yet.

#2 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#3 - 2018-02-23 07:28 PM - Paolo Cavallini

- Description updated

Possibly the first 5 results could be shown, or the first valid (not NULL) result.
