

QGIS Application - Feature request #6674

Curved labels : option to draw labels even if the line is too short

2012-11-10 06:03 AM - Laurent Gasnier

Status:	Open	Resolution: Copied to github as #: 15846
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
Hi, Curved labels are not drawn if the line is too short. See attached screenshot missing_curved_labels.png: - brown lines with arrow: layer to label - black labels: WMS Mapserver layer - red labels: QGIS labels I don't know it must be an option or it's un bug of the labeling tool, but, for the user, the difference with parallel labels is surprising (compare with second attached screenshot no_missing_curved_labels.png).
