QGIS Application - Feature request #6683
Add duplication option to embed layers/groups dialog

2012-11-13 11:56 AM - Larry Shaffer

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	15851

Description

As an option to embedding a layer/group, also offer a duplicate function in the dialog. This would be similar to embedding the layer/group, then duplicating it in the legend, except it could be done immediately, and possibly without any canvas refresh.

Currently, #6682 would need to be implemented before such a duplicate function in the dialog would work properly. It would then offer the user a fairly complete means of duplicating layers/groups across projects.

I am assigning this to myself. If some time passes and I do not show any progress, please re-assign.

Hi Larry,

do you think having time for this for 2.0? Let us know some of us are really interested! régis
