Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 15873
Description - Style a layer using the rule-based renderer. - Open the layer properties dialog to the style tab. No rules will be selected, and the "refine current rules" button will be disabled. - Click to select a rule. The "refine current rules" button will be enabled. - Click below the list of rules. The rule will be unselected, but the "refine current rules" button will still be enabled! - Click the "Refine current rules" button. Nothing will happen!
