

QGIS Application - Bug report #6714

Attribute table does not make search results immediately visible

2012-11-15 11:28 PM - Sandro Santilli

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 15879
Description		
<p>When searching for a single row in the attribute table the results are not automatically shown in the window, but you have to explicitly use "show only selected rows" in order to see the result (and thus do further operations on it). This is particularly annoying when you have a lot of rows.</p> <p>I think it should at least scroll so that the first result is within the visible area.</p> <p>I'm not sure if this is a bug or feature (dunno if it ever worked the friendly way)</p> <p>BTW, I found enough tickets related to "attribute table" that having an "Attributes table" category could help.</p>		

History

#1 - 2014-06-23 10:19 AM - Giovanni Manghi

- Resolution set to fixed/implemented
- Status changed from Open to Closed

it works as expected now.
