<b>Description</b>		
<p>Hello,</p> <p>I recently started using your gis program, but it started repeatedly crashing on me last week when I try to open .shp files.</p> <p>I tried uninstalling and reinstalling it, but to no avail.</p> <p>Any suggestions?</p> <p>Thank you,</p> <p>Ag</p> <p>P.S. The error notificaiton says it writes it to a log, but the log is not there when I search for it.</p>

Try the latest preview release to see if the problems go away:

Make sure you uninstall the old version

- Resolution set to fixed

- Status changed from Open to Closed

Useless bug: without a sample failing shp, this cannot be replicated.
