QGIS Application - Bug report #6758
qgis.exe has stopped working

2012-11-25 05:34 PM - Henk Hofmans

Status:	Closed			
Priority:	Normal			
Assignee:	Henk Hofmans			
Category:				
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	invalid	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	15914	

Description

When I exited qgis, I was asked to save and after confirming this, the program crashed reporting: "qgis.exe has stopped working". Now when I try to open the project, qgis keeps keeps crashing this way.

Ideas: Could it be that the project file became corrupted because I closed the program when it was still generating a *.png image?

What operating system? What QGIS version? Did you tried removing any third party plugin, and more in general disabling any plugin in the plugin manager?

Do you have a project/dataset that allows to replicate the issue in a predictable way?

#2 - 2012-12-25 06:36 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed

closing for lack of feedback.
