

QGIS Application - Bug report #677

Qgis crash report (generated by windows)

2007-03-21 11:40 AM - yankuic-oikos-unam-mx -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Affected QGIS version:		Regression?: No
Operating System: Windows		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10736
Description		
This is a crash report generated by windows for Qgis. I use QGIS 0.8 for windows with an install of grass 6.2.1 in a dell inspiron 6400 with intel core duo 2300 processor. The crash event was generated after trying to import a vector layer in .shp format to grass. After that qgis crash completely and the program was unable to work properly. I had to unistall qgis and delete all the registry entries to have then a clean reinstallation. I hope this report help to improve qgis. I have not to much computer skill's so the only think I can do is send this file. <pre><DATABASE> <EXE NAME="qgis.exe" FILTER="GRABMI_FILTER_PRIVACY"> <MATCHING_FILE NAME="comerr32.dll" SIZE="24576" CHECKSUM="0x1501D1D3" BIN_FILE_VERSION="1.3.5.0" BIN_PRODUCT_VERSION="1.3.5.0" PRODUCT_VERSION="1.3.5" FILE_DESCRIPTION="COM_ERR - Common Error Handler for MIT Kerberos v5 / GSS distribution" COMPANY_NAME="Massachusetts Institute of Technology." History

#1 - 2007-07-14 03:08 PM - pyelk -

Here's my scenario when QGIS crashed:

Had v0.8 installed. Saw there was an upgrade so I uninstalled v0.8 and installed v0.8.1. Restarted computer and attempted to run QGIS. My anti-virus program (AVG) stated it had found a hidden file extension in program 'r.out.mpeg.exe.' Told AVG to ignore as I know it was a valid file name. QGIS would not start. Shut down and restarted my computer and again attempted to run QGIS. Again AVG warned about a hidden file extension. This time I told it to quarantine it. Then shut down and restarted by computer and attempted to run program. It would not run. Decided to uninstall v0.8.1 and reinstall v0.8. Restarted my computer and attempted to run v0.8. It would not run and generated an error report, which I attached above.

Decided that maybe there was something else going on so I updated AVG and my 2 spyware programs; ran a "deep" or "full" scan and other than finding 5 tracking cookies, nothing was found.

Now QGIS v0.8 will not run so I am dead in the water.

Please fix in release 0.8.2 so I can continue using QGIS.

Thanks,

Paul

Now QGIS v0.8 will not run so I am dead in the water.

Please fix in release 0.8.2 so I can continue using QGIS.

Thanks,

Paul

What happens if you turn off AVG completely? I guess what I'm wondering is if this is a problem with QGIS itself or just AVG confusing it with malware.

Try the new vers of QGIS:

http://whatnick.dyndns.org:8080/tisham/qgis_setup0.9.2rc1_16_02_2008.exe

and if all is ok, close this bug.

Thank you

#4 - 2008-03-20 03:37 AM - leolami -

- Resolution set to fixed

- Status changed from Open to Closed

I close it. If you think it is still valid reopen it, please.
