**Description**

I tend to think the north arrow that the North Arrow decoration uses is better looking than most of the north arrows in the svg directory. It seems to have become much harder to access now that the North Arrow is core.

Is it possible to have it added to the SVG north arrows?

(I've had a go at making it an svg - attached.)

**History**

**#1 - 2012-12-11 06:47 PM - Larry Shaffer**

- *Target version set to Version 2.0.0*

- *Status changed from Open to Closed*

Thanks Ramon!

Added to SVG north arrows with commit commit:e38b222. Converted 'N' text to path and centered N over star.
