QGIS Application - Bug report #6853
Point displacement center symbol displayed for values removed from layer

2012-12-11 12:15 AM - Nick Dig

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Symbology			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15988	

Description

Using point displacement on data that are rendered by category, the function works as expected for the values listed in the renderer settings. But if a subset of values are removed from the renderer settings the center symbols for the removed values are also displayed.

History

- Category set to Symbology

#2 - 2015-09-15 06:32 PM - Nyall Dawson

- Status changed from Open to Feedback

Unless I'm misunderstanding, this isn't reproducible in current versions.... Can you confirm?

#3 - 2015-11-10 04:02 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

Closing for lack of feedback. Reopen if necessary.
