

QGIS Application - Bug report #6891

Connection to non-spatial PostgreSQL

2012-12-18 06:59 AM - Paolo Cavallini

Status: Closed	
Priority: Normal	
Assignee:	
Category: Data Provider/PostGIS	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 16016
Description	
QGIS throws an error when trying to connect to a plain (non PostGIS) db. I think this limitation should be removed, because: - QGIS can load non spatial tables, so also a non spatial db is somehow usable - EXTENSION postgis can be created from within QGIS (e.g. through DB Manager), so an user could connect to a non spatial PostgreSQL and make it spatial.
