

QGIS Application - Feature request #6988

Print Composer - Centered map

2013-01-13 04:37 PM - Miroslav Umlauf

Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 16093
Description		
Unfortunately when I create map frame in <i>Print Composer</i> , the layer is centered on width (good) but <b>not centered on height</b> (I guess it is aligned to bottom).		
If I use button Set to map canvas extent in <i>Print Composer / Item Properties / Extents</i> it is again centered on width but <b>not centered on height</b> - this time looks aligned to top.		
I think in both cases it would be much better to have it centered.

Hi

"Not able to center map in map canvas" through coding - Reference (Feature request #6988 - facing same problem )

I am using windows 7 and QGIS 2.6.1 Brighton (API 2.6) version

Can anybody update on this

Regards,  
Balaji

Got some answer saying that it has been fixed in latest api version. But i am also facing the same issue. I tried using API 2.2 and API 2.6 but not working.

Can any one give us code snippet used to come over this issue.

Regards,  
Mohanakarthick
