

QGIS Application - Bug report #6997

Locks kept on layers after removal from registry

2013-01-15 12:40 AM - Sandro Santilli

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider/PostGIS	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 16101
Description		
<p>How it happened:</p> <ul style="list-style-type: none">- Open DBManager, select a topology schema, select Topology Viewer- Issue a SELECT DropTopology(<topology_name>) from an external monitor (psql)- Verify that the command hangs, waiting on a lock- Remove the whole topology viewer layer group from the registry <p>What happens:</p> <ul style="list-style-type: none">- The DropTopology select is still waiting for the lock to be removed <p>Expected behavior:</p> <ul style="list-style-type: none">- QGIS releases the lock when the layer is removed, and DropTopology command can complete <p>NOTE: I had to close QGIS in order for the command to complete.</p> <p>This happened with qgis as of head = commit:314d144</p>		

History

#1 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#2 - 2019-03-09 04:04 PM - Giovanni Manghi

- Resolution set to end of life
- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
