Apparently a residue from merge conflict somewhere. I found a bunch of gitosis.conf which are located in /var/www/redmine/tmp/*/gitosis/gitosis.conf - not sure if those are actually used or a backup copy from somewhere else. But I fixed the latest copy:

```

Maybe someone else can shed light on this...

- Status changed from Open to Closed

The merge conflicts were caused by a manual gitosis config conflicting with the redmine gitosis plugin. I solved the conflict manually in repo gitosis@qgis.org:gitosis-admin.git.
