Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 16125
Description		
<p>I think I found a pretty annoying bug in the Map Composer. QGIS cannot correctly save the extents of the map. Same problem with Windows and Linux with QGIS 1.8 and 1.9. Replicate this bug is simple, create a new print composer, add a map and zoom to something, take a screenshot of the extents of the map, save and close the project, reopen, open the composer and take a look at the extents, they have been simplified and the map has been moved.</p> <p>My two screenshots: http://www.pasteall.org/pic/show.php?id=44090</p>
