Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	No	Copied to github as #: 16177
Description		
<p>In the bottom right of QGIS there's a little exclamation mark inside a triangle. It reports "messages logged". I've minimised my QGIS and all of QGIS disappears. But a few seconds later the tooltip reappears and the number of messages has incremented.</p> <p>See attached screenshot. That's right where the tooltip would be if I had QGIS open.</p> <p>Using NextGIS built from master. Windows 7, 32bit.</p>
