QGIS Application - Bug report #711
GRASS plugin compile error: GRASS_VERSION_MAJOR etc. no longer strings

2007-05-01 02:02 PM - Markus Neteler

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Build/Install			
Affected QGIS version:			**Regression?:**	No
Operating System:	Debian		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	duplicate
Crashes QGIS or corrupts data:			**Copied to github as #:**	10770

Description

Currently QGIS no longer compiles with GRASS 6.3.CVS since the include/version.h was modified to:

```
bartok:grass63[296.2] cat include/version.h
#define GRASS_VERSION_STRING   "@(#) 6.3.cvs (2007)"
#define GRASS_VERSION_MAJOR   6
#define GRASS_VERSION_MINOR   3
#define GRASS_VERSION_RELEASE  cvs
```

Here the change from Glynn:

http://freegis.org/cgi-bin/viewcvs.cgi/grass6/include/version.h.in.diff?r1=1.4&r2=1.5

And a comment from Glynn:

http://grass.itc.it/pipermail/grass-dev/2007-April/030658.html

I'm afraid that this needs to be conditionalized. The QGIS code is in src/providers/grass/qgsgrass.cpp, lines 988 and following.

Compare the related GDAL-GRASS plugin changes at

http://trac.osgeo.org/gdal/ticket/1587

Sorry for the mess,
Markus
