

QGIS Application - Bug report #7115

eVis Event Browser doesn't show http images

2013-02-07 01:47 AM - cremat0rio -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	C++ plugins/Evis	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 16189
Description I'm trying to get eVis Event Browser show the images of the POINTs on a layer. I've added the layer from Postgres. Then configured the Event Browser. If i use smb addresses (started with \\) everything works fine. But when i try to use the URL (started with http://) it doesn't work. On the server logs i can see that the image is GET, but QGis doesn't show it. See the attached screenshots. I used QGis 1.8.0 and 1.9.0-Master (b35a456).
