QGIS Application - Bug report #7126
User needs to be able to cancel long render operation

2013-02-08 05:11 PM - Patrick Dunford

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Map Canvas			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16195	

Description

During a render that is taking a long time, the user has no opportunity to cancel the operation.

There should be either a dialog box with a cancel button presented, or the keyboard should be scanned for presses of the Esc key.

Otherwise there is only the option of force quitting the application and losing unsaved changes in the current project.

near the bottom right of the qgis window you have a "stop rendering" button, does this work for you?

#2 - 2014-06-21 01:40 PM - Giovanni Manghi

- *Resolution set to fixed/implemented*

- *Status changed from Feedback to Closed*

with multithreading this is no longer an issue.
