

QGIS Application - Bug report #7127

Error when saving project with memory layers

2013-02-08 07:12 PM - Larry Shaffer

<b>Status:</b>	Closed	
<b>Priority:</b>	Severe/Regression	
<b>Assignee:</b>		
<b>Category:</b>	Data Provider	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 16196
<b>Description</b>		
<p>When saving a project with memory layers the following dialog appears:</p> <p>'QgsVectorDataProvider' object has no attribute 'select'</p> <p>This is since new vector api upgrade. I'm assuming this is just because the memory layer provider has not be upgraded yet.</p>		

History

- #1 - 2013-02-09 01:03 AM - Giovanni Manghi
- Priority changed from Normal to Severe/Regression
- #2 - 2013-02-09 12:34 PM - Larry Shaffer
- Status changed from Open to Closed

After some more testing, it is not QGIS, but the MemoryLayerSaver plugin. Moving issue to that tracker.
