

## QGIS Application - Feature request #7128

### Enhance the Categorized rendering adding the option for describe numeric intervals

2013-02-09 05:16 AM - aperi2007 -

<b>Status:</b>	Closed	<b>Resolution:</b> fixed/implemented <b>Copied to github as #:</b> 16197				
<b>Priority:</b>	Normal					
<b>Assignee:</b>						
<b>Category:</b>	Symbology					
<b>Pull Request or Patch supplied:</b>						
<b>Easy fix?:</b>	No					
<b>Description</b>						
<p>Firstly:</p> <p>I know this could be done using the rule renderer.</p> <p>But the use of the categorized rendering is more simple and fast.</p> <p>Actually, the categorized allow only set of equals value.</p> <p>I guess a good enhancement could be to give the possibility' when the values are numerical to set not only the exact value but also the value interval.</p> <p>The numeric interval could be set using this syntax:</p> <table><tr><td>Value</td><td>Label</td></tr><tr><td>123.23 : 234.45</td><td>Values from 123.23 to 234.45</td></tr></table> <p>(including minor valor and excluding major value in the internal interval for the category set)</p>			Value	Label	123.23 : 234.45	Values from 123.23 to 234.45
Value	Label					
123.23 : 234.45	Values from 123.23 to 234.45					

#### History

##### #1 - 2017-05-01 12:48 AM - Giovanni Manghi

- Easy fix? set to No

##### #2 - 2017-05-02 03:33 PM - Regis Haubourg

- Resolution set to fixed/implemented

- Status changed from Open to Closed

- Description updated

From what I understand, you describe the exact behavior of the Graduated renderer here.
