

QGIS Application - Feature request #7145

Show layer groups in "identifiable layers" and "snapping options" panels

2013-02-11 05:48 AM - Giovanni Manghi

Status:	Open	Resolution: Copied to github as #: 16209
Priority:	High	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>On large projects the layers are very often organized in groups.</p> <p>So when you open "identifiable layers" if groups are not shown you see a very long list of layers, and detecting what is to be checked and what not is very hard.</p> <p>ideally in this panel the structure of the TOC should be replicated.</p>
