

QGIS Application - Bug report #7196

Strange behaviour of Print manager popup

2013-02-20 10:54 AM - Paolo Cavallini

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 16242
Description At least on Gnome3 and OSX, probably on other DE, when clicking on Composer Manager, then on the desired layout, the popup stays upfront, and to access the layout one has to close it, and click on the composer window. Surely there is a better behaviour. The advantage of the current solution (multiple composer windows can be opened) are outweighed by the cumbersomeness of the solution, IMHO.
