

QGIS Application - Bug report #7212

WFS client is broken

2013-02-22 12:02 AM - Victor Olaya

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Web Services clients/WFS	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 16251
Description		
WFS client is not working. It connects to a WFS service and it seems to get the data (it takes longer when the layer in the request is larger), but then the layer it adds is always empty. Connecting to the same services with 1.8 works without problems		

History

#1 - 2013-02-22 12:18 AM - Giovanni Manghi

- Target version set to Version 2.0.0
- Priority changed from Normal to Severe/Regression

#2 - 2013-03-20 04:22 AM - Regis Haubourg

not reproduced in 32de07d osgeo4w using following service <http://adour-garonne.eaufrance.fr/servicesOGC?>

#3 - 2013-03-20 04:24 AM - Regis Haubourg

Sorry, layer's geometry is here but data attributes are empty.
Reproduced then.

#4 - 2013-04-12 04:51 AM - Marco Hugentobler

- Status changed from Open to Closed

Seems to be fixed in the meantime. Attributes are here again (Tested with one QGIS Server and a Geoserver instance). Please test and reopen the ticket if you still encounter the problem with a recent master.
