

QGIS Application - Bug report #7238

Identify does not work anymore in qgis server master

2013-02-26 02:01 AM - Giovanni Manghi

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Radim Blazek	
Category:	Web Services clients/WMS	
Affected QGIS version:	master	Regression?: No
Operating System:	unspecified	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 16266
Description		
With qgis (server) master, the identify tool does not return any result on a published layer. In the qgis log I see Get feature info request error (Title:: Error:: URL: http://localhost/cgi-bin/qgis_mapserv.fcgi?map=/home/gio/Desktop/bing/teste19.qgs&#38;&#38;SERVICE=WMS&#38;VERSION=1.3.0&#38;REQUEST=GetFeatureInfo&#38;BBOX=-20037508.3427892439067364,-20037471.2051370665431023,20037508.3427892476320267,20267,20037471.2051370255649090&#38;CRS=EPSG:3857&#38;WIDTH=1000&#38;HEIGHT=999&#38;LAYERS=frmt_wms_virtualearth&#38;STYLES=&#38;FORMAT=image/png&#38;QUERY_LAYERS=frmt_wms_virtualearth&#38;INFO_FORMAT=text/xml&#38;I=489&#38;J=415&#38;FEATURE_COUNT=10) With the same project but under 1.8 all works fine.

Issue #7258 is probably related

#2 - 2013-03-01 05:10 AM - Marco Hugentobler

- Assignee set to Marco Hugentobler

#3 - 2013-03-01 05:35 AM - Marco Hugentobler

- Assignee changed from Marco Hugentobler to Radim Blazek

- Category changed from QGIS Server to Web Services clients/WMS

This is a client problem. GetFeatureInfo from browser works normally.

The problem is that QGIS now prefers the output format text/xml. However, if the xml is not gml, the WMS client does not do anything with it (quite understandable, the output form of GetFeatureInfo is left to the server according to the WMS spec).

#4 - 2013-03-13 01:49 AM - Radim Blazek

- Status changed from Open to Closed

Fixed in changeset commit:"173aee6e3204a8845c4929836fa894fd506ae986".

#5 - 2013-03-13 01:52 AM - Radim Blazek

It should be fixed.

Now you should get with QGIS mapserver optional (combo in identify results) text and html format.
