QGIS Application - Bug report #7243
Default CRS for Georeferencing

2013-02-27 07:29 AM - Andre Joost

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	C++ plugins/Georeferencer		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	end of life
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16270

Description

If a user wants to georeference a raster file by clicking points on the image and on the canvas, it is necessary to set the CRS of the georeference output to the project CRS.

Unfortunately, the Georeferencer presets the output CRS to the one used last. I suggest to default to the CRS of the current project, and issue a warning when the user changes the output CRS before starting the georeferencing process.

Georeferencing to another CRS only makes sense if the GCP coordinates are read from the raster map itself, e.g. from a grid.

History

#1 - 2014-06-28 07:43 AM - Jürgen Fischer

- Target version changed from Version 2.0.0 to Future Release - Lower Priority

#2 - 2014-06-29 06:36 AM - Jürgen Fischer

- Category changed from C++ Plugins to C++ plugins/Georeferencer

#3 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#4 - 2019-03-09 04:04 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
