

QGIS Application - Feature request #7349

Duplicate Layer menu selection

2013-03-13 01:45 PM - Aren Cambre

Status:	Closed	Resolution: Copied to github as #: 16326
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Please give us the ability to duplicate a layer. It should go in both the Layer menu and the right-click context menu when you right-click on a layer.</p> <p>I have a situation now where I need to create a few instances of an existing PostGIS layer. I need each instance to have a different query. Currently, I have to manually build each new layer. That is cumbersome.</p>
