

QGIS Application - Bug report #7370

QGIS 1.8 crashes when attempting to specify CRS

2013-03-16 12:01 PM - Charles Petersen

Status:	Closed	
Priority:	High	
Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:	Windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 16343
Description When running QGIS 1.8 Lisboa, QtCore4.dll causes program crash when attempting to specify CRS for layer or project on two separate Windows 7 platforms (one Win7 Professional and the other Win7 Home Premium). The problem does not occur when running QGIS 1.8 on a Windows XP Professional platform. Diagnostics already performed: disabled McAfee realtime scanning and reinstalled QGIS; deleted .qgis folder and reinstalled QGIS with new .qgis folder; searched for other versions of QtCore4.dll on computer with negative results (i.e., the version in C:/Program Files (x86)/Quantum GIS Lisboa/bin is the only one on my computer. Good luck!

Do you use custom CRS?

Try this:

1. open regedit
2. go to HKEY_USERS\S-1-5-21-[many numbers here]-1000\Software\QuantumGIS\QGIS\UI
3. remove recentProjections and recentProjectionsAuthId
4. start QGIS
5. Try to specify CRS again

related #7377

#3 - 2013-03-17 01:43 AM - Maxim Dubinin

- Affected QGIS version changed from 1.8.0 to master

#4 - 2013-03-17 06:25 AM - Giovanni Manghi

- Priority changed from Normal to High

#5 - 2013-03-18 04:51 AM - Charles Petersen

Fix proposed by Maxim Dubinin:

"1. open regedit

2. go to HKEY_USERS\S-1-5-21-[many numbers here]-1000\Software\QuantumGIS\QGIS\UI

3. remove recentProjections and recentProjectionsAuthId
4. start QGIS
5. Try to specify CRS again"

solved the problem described in my original bug report 7370, 16 March 2013.

Большое спасибо!

Charles, do you mean the bug is now fixed in master ?

#7 - 2013-06-02 07:46 AM - Giovanni Manghi

- *Status changed from Open to Feedback*

#8 - 2013-06-30 12:23 PM - Maxim Dubinin

Sandro, Giovanni,

as I understood, no, Charles thanked me for the solution that involved editing registry. But the problem is still there. See #7377

I guess both this ticket and #7377 should be closed when it is fixed. Seems like an easy fix, btw)
