

QGIS Application - Bug report #7374

QGIS crashes when loading previously saved project with reproject CRS

2013-03-16 06:01 PM - John Sankey

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	1.8.0	Regression?: No
Operating System:	Mac OSX	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 16346
Description		
<p>QGIS 1.8.0 Mac OS 10.6.8: project with QGIS-produced WGS83 shapefiles and geotiffs; when reproject on the fly to UTM 18 selected it works during that session, but when project is saved QGIS crashes when attempting to reload project. See http://gis.stackexchange.com/questions/25067/changing-crs-crashes-qgis-every-time</p>		

History

#1 - 2013-03-17 06:28 AM - Giovanni Manghi

- Priority changed from Normal to High
- Category set to Project Loading/Saving

Does happen also with qgis-master?

#2 - 2013-03-17 12:15 PM - John Sankey

I don't dare risk upsetting 1.8.0 with another version, Giovanni - I've a major project that needs QGIS to work for the next month and am working around every problem I hit to keep going, in this case by raiding backup, skipping a CRS and using Photoshop to scale X-Y output properly.

#3 - 2013-07-14 10:53 AM - Daniel Vaz

I test it in master version. I can't reproduce in QGIS master.

I think that issue is specific of 1.8.0 version.

#4 - 2014-02-09 05:01 AM - Martin Dobias

- Resolution set to worksforme
- Status changed from Open to Closed

Closing for lack of feedback, probably does not affect recent versions.
