It worked for me in Windows master. It took around 3 minutes to process the first feature(probably the one with a lot of holes) without any update to progress. Then it updated the progressbar well to complete in around 3.5 minutes.

- Resolution set to invalid
- Status changed from Open to Closed

correct, now it works. Probably something was fixed along the way.

The "ftools" category is being removed from the tracker, changing the category of this ticket to "Processing/QGIS" to not leave the category orphaned.
