

QGIS Application - Feature request #7486

Dupe icon on the print composer

2013-04-01 01:40 PM - Antonio Locandro

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Pull Request or Patch supplied:		
Easy fix?:	No	Resolution: Copied to github as #: 16438
Description		
Image shows the same icon reflecting two different actions, maybe its time to rethink the icons used here since the print icon is used for the new composer and other stuff, maybe a rework is advised here

Hi Antonio,

That default theme is going to be deprecated with QGIS 2.0. Please switch over to the 'gis' theme to see the new set and compare/contrast.

#2 - 2013-04-03 07:43 AM - Antonio Locandro

I have already switched to the new 'gis' theme, now thats a huge improvement!

Probably getting a UI/UX & Designer to bring all together and make the software look more consistent would be great
