

QGIS Application - Feature request #7539

[composer] More options for customising column breaks in legends

2013-04-07 07:11 PM - Olivier Dalang

Status:	Open	Resolution: Copied to github as #: 16482
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Hi !</p> <p>Columns breaks in the composer legends happen without regard to the new "Group"/"Subgroup"/"Hidden" mechanism, making it possible for elements to be split across different columns even if they are in the same group/subgroup.</p> <p>IMO, there should be the following options (radio buttons) :</p> <ul style="list-style-type: none">- "Split at groups" (splits can occur only right before a new group)- "Split at subgroups" (splits can occur only right before a new group or subgroup)- "Split anywhere" (splits can occur anywhere) <p>And to be perfectly customizable, we may also need the ability to insert manual column breaks.</p> <p>I'm not sure if this should be filed as a bug or a feature, bug right now, the results are hard to predict and not very usable.</p> <p>Thanks !!</p>		

History

#1 - 2014-02-07 01:32 PM - Nyal Dawson

- Subject changed from Columns break in multicolumns composer legends happen at wrong place to [composer] More options for customising column breaks in legends
- Tracker changed from Bug report to Feature request

#2 - 2014-02-07 01:32 PM - Nyal Dawson

- Category set to Map Composer/Printing

#3 - 2017-05-01 12:48 AM - Giovanni Manghi

- Easy fix? set to No
