<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 10813
<b>Description</b>		
<p>Text labels ,text legend and text scale bar in the map composer are not readable by default (Font: Sans serif) (Fig.1).</p> <p>They became readable if I change the font (es. Arial, Times New Roman....) and the size.</p> <p>If I increase the size of the text in the legend I see a change in the font of the name of the layers without that I change it. The font of the class layers text doesn't change. The same with other text (label) (Fig.2, font: Times new roman)</p>

- Resolution set to fixed
- Status changed from Open to Closed

This was a Qt bug that affected Ubuntu (and possibly other distros). I can't reproduce it on Hardy with Qt 4.3, so I'm closing it.
