

## QGIS Application - Bug report #7562

### QGIS Server WMS: Annotation text shows up in white instead of black

2013-04-10 05:56 AM - Andreas Schmid

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Marco Hugentobler	
<b>Category:</b>	QGIS Server	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 16503
<b>Description</b>		
<p>I added a text annotation containing the default text and text color (black) to a QGIS project served by QGIS Server (WMS). However, in the GetMap request the annotation text shows up in white instead. I needed to change the text color to a different one and back to black in order to get a black text annotation in the GetMap request.</p>		

#### History

##### #1 - 2013-04-13 03:03 AM - Marco Hugentobler

- Category changed from Web Services clients/WMS to QGIS Server

##### #2 - 2017-01-29 03:10 PM - Nyall Dawson

- Resolution set to invalid

- Status changed from Open to Closed

I suspect this has been fixed in the releases following this report - annotations, text and server have all been considerably reworked. Please reopen if reproducible in current QGIS versions.
