QGIS Application - Bug report #7567
Composer table invisible when added to composition

2013-04-10 08:51 PM - Tim Sutton

Status:	Closed		
Priority:	Normal		
Assignee:	Marco Hugentobler		
Category:	Map Composer/Printing		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	OSX	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16507

Description

In version 8c714a9 / 1.9 master, when I add a new table to the composition, the table widget is not visible. Also the following things should be noted:

- changing frame settings has no effect
- no content is displayed in the table despite multiple attributes being ticked in the item properties attributes list
- changing 'show only visible features' on and off has no effect.

History

#1 - 2013-04-12 07:00 AM - Marco Hugentobler

- Status changed from Open to Closed

Composer table should work again with cddbeb1dcdd68c3baeaa717eeafb0a17c10125df
