it crashes also if it just goes in timeout.

#2 - 2013-06-04 06:11 AM - Laurent Defert

Hello,

I cannot reproduce the crash, I think it may have been fixed with the patch I submitted for #7913, can you confirm ?

Though, the error messages should be changed imho to make them more user-friendly (the "unexpected character" and "Operation canceled" when a timeout occurs).

Anyway, here, it's not crashing, but it seems the connection thread is not cleaned properly. Even after closing the wfs client dialog, I'm getting every 20s a new entry in the network log about the timeout (though no connection attempt is made as I can see with tcpdump). Should I open a new ticket for this issue or is it ok to continue on this ticket ?
