

QGIS Application - Feature request #76

show attribute names as row headers rather than cell values when digitising

2006-04-13 04:09 PM - Tim Sutton

Status:	Closed	
Priority:	Low	
Assignee:	Marco Hugentobler	
Category:	Digitising	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 10135
Description		
Currently when digitising, the attribute entry dialog is showing field names as cells, which means you need to do double the number of keystrokes to tab through the cells. Also these 'label' cells are editable wich is misleading for nivice users..

- Resolution set to fixed
- Status changed from Open to Closed

I did some experiments with the table header and couldn't find a way to make the width of the vertical header resizeable (only the height of the individual items). But I disabled editing for attribute items so users cannot change them.
