QGIS Application - Bug report #7607
Crash after importing a vector layer to db using DBManager

2013-04-14 03:22 AM - Emilio Loi

Status:	Closed			
Priority:	Normal			
Assignee:	Giuseppe Sucameli			
Category:	DB Manager			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	worksforme	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	16535	

Description

In a new project, load a shape file then import the layer to db using DBManager. After importing, close DBManager and right or left click anywhere on the canvas or on the table of content. Qgis will crash immediately.

Unable to reproduce it...

Please, give me more details on how to reproduce it, OS and QGis version...

It happens on Ubuntu 12.10 3.5.0-27 with Qgis versions 1.9.0-master rev 8e11e5f & rev 8694c19

Are you importing the shapefile on a PG or SL database? What version of PG/SL? Could you provide the shapefile (or, better, a subset) you import to reproduce the problem?

#4 - 2013-04-16 02:43 AM - Emilio Loi

PostgreSQL 9.1.9
POSTGIS="2.0.2 r10789"

You can use any sample file in tests/testdata folder (i.e. french_parts.shp)

- Priority changed from High to Normal

I cannot reproduce it either

#6 - 2014-01-26 10:13 AM - Giovanni Manghi

closing for lack of feedback.

#7 - 2014-01-26 10:13 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Feedback to Closed
