QGIS Application - Bug report #7654
Python Console editor unable to import qgis.*

2013-04-19 09:58 AM - Gary Sherman

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Python plugins			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	OS X, Linux	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	16574	

Description

The Python Console editor (d4d26257b77) is unable to import qgis and other modules when running a script. See attached screen shot. The console is able to import.

This occurs even if the PYTHONPATH points to the qgis modules prior to running QGIS.

Hi Gary,

Did you have set the PYTHONPATH in Settings -> System ?

Maybe it is better to warn the user with any message!

However, I will try to fix it in a different way.

Thanks for the feedback!

#2 - 2013-05-25 04:54 AM - Nathan Woodrow

- Resolution set to fixed

- Status changed from Feedback to Closed

Seems to be fixed now
