

QGIS Application - Feature request #7657

Automatically default setting for vector analyses related to projection type

2013-04-19 11:18 PM - Paolo Cavallini

Status:	Open	Resolution: Copied to github as #: 16577
Priority:	Normal	
Assignee:		
Category:	Vectors	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Most defaults for vector analyses have a default value (typically 0,0001; see e.g. Simplify) suitable for latlong projections (in degrees), but unreasonable for metric SRS. Better to change this to 1 when the layer is metric.</p>		

History

- Easy fix? set to No

#2 - 2018-02-24 01:31 PM - Paolo Cavallini

- Subject changed from Default setting for vector analyses related to projection type to Automatically default setting for vector analyses related to projection type

Still true. Now with reprojection always on it's even easier to get unreasonable results.
