In Sextante you need to toggle "Advanced interface" to see Grass algs.

In Ubuntu, Grass 6.4.2 both are working fine. Maybe its related to your grass version being 6.4.3 rc2.

#2 - 2013-04-21 03:07 AM - Alessandro Ciali

I can't find "advanced interface" on sextante,windows master, can you explain me where to find this option? It doesn't exist under sextante configuration win.

Latest win master comes with GRASS 6.4.3.RC2, that works fine with older master version installed some days ago

Thanks Pilipe, I got it. But the problem is still here: when selecting tools, a message appears telling that grass is not configured. I have checked out configuration, It seems to be ok. The same configuratio works whit previous version. I think the problem could be in the GRASS plugin.

probably fixed with commit:6ee2d183696ae4c2be27350dd3519a9ba11b9a7b

this issue shows every time GRASS is updated in osgeo4w because after it is necessary to update the qgis/grass plugin.

#6 - 2013-04-21 11:54 AM - Alessandro Ciali

updated Grass, Grass algorithms under sextante are workig now, but grass plugin has desapareared vron rhe plugin list. Any suggestion?

No, GRASS 6.4.2RC3 was added today and will be picked up with the next nightly build - so this should only be an issue between the upload of GRASS and the next nightly build.
