

QGIS Application - Feature request #7670

The usage of keyboard short-cuts (Zooming in/out)

Pull Request or Patch supplied:	No	Resolution: duplicate
Easy fix?:	No	Copied to github as #: 16587
Description		
<p>At present the key combinations [Ctrl][+] and [Ctrl][-] are used to activate “Zooming in” and “Zooming out” tools respectively. To my opinion more usable would be to use these combinations for the actions – zooming in and zooming out respectively. So I can use just a keyboard to zoom in/out and move map canvas (appropriate arrow keys) without touching a mouse.</p>
