

QGIS Application - Bug report #7676

Qgis crashes when trying to open layer properties

2013-04-22 07:59 AM - Victor Axbom

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Vectors	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 16593
Description		
<p>When I try to reach the layers properties dialog qgis just crashes without even an error message. It doesn't matter which layer, I have tried with a lot of different shapefiles and also some PostGIS-tables. I have tried to reinstall and wipe the registry but nothing seems to solve it. It's only affect the vector properties, I can still reach a raster layer properties dialog.</p>

- Status changed from Open to Closed

I removed the .qgis2 user-folder under C:\\Documents and settings and the problem is solved. I guess there were some problem in the symbology db which caused qgis to crash.
