QGIS Application - Bug report #7677
Qgis crashes after dissolving a shapefile

2013-04-22 09:29 AM - Filipe Dias

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Processing/QGIS			
Affected QGIS version:	master	**Regression?:**		
Operating System:	Linux Ubuntu 12.04	**Easy fix?:**		
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	16594	

Description

1) Load attached shp

2) ftools -> dissolve -> Dissolve all or Dissolve with field "Diss". Select add shp after finishing.

3) Qgis will crash, either immediately or after the user does something (e.g. open a Menu, add a shp etc)

Ubuntu 12.04 64 bits

Message from terminal

Warning: QLayout: Cannot add null widget to QVBoxLayout/mAttributeEditorLayout
Segmentation fault (core dumped)

History

It only occurs when you tell QGIS to add the result layer to the TOC, doesn't it?

In this case seems it's duplicate #7674.

#2 - 2013-04-22 02:34 PM - Filipe Dias

- Resolution set to duplicate

- Status changed from Open to Closed

Yes, that's it.

#3 - 2017-05-01 01:21 AM - Giovanni Manghi

The "ftools" category is being removed from the tracker, changing the category of this ticket to "Processing/QGIS" to not leave the category orphaned.
