

QGIS Application - Bug report #7695
GetLegendGraphic does not work with FORMAT=jpeg even GetCapabilities says so

2013-04-24 08:07 AM - Marco Lechner

Status:	Closed	
Priority:	Normal	
Assignee:	Marco Hugentobler	
Category:	QGIS Server	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	Yes	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 16609
Description		
<p>Even GetCapabilities of a QGIS mapserver WMS tells jpeg is a valid format for GetLegendGraphic requests, trying this format results in an exception telling that GetMap does not support "jpeg" format but works with the not listed "jpg". Pull request #554 adds jpg, jpeg, image/jpg and image/jpeg as valid formats to GetMap and GetLegendGraphic requests.</p>
