

QGIS Application - Bug report #7707

"merge shapefiles" produces wrong output on master (ok on 1.8)

2013-04-25 12:32 PM - Giovanni Manghi

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Processing/QGIS	
Affected QGIS version:	master	Regression?:
Operating System:		Easy fix?:
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 16618
Description		
<p>Use the "merge shapefiles" tool to merge the two attached shapes "inputA" and "inputB".</p> <p>On master the output is missing geometries, for example look for "19k07" in the "name" column.</p> <p>In the output this record should be present two times, like it happens when merging qgis 1.8 but on master it shows just one time.</p>

History

#1 - 2013-07-10 03:33 AM - Jürgen Fischer

- Status changed from Open to Feedback

Not reproducible.

#2 - 2013-07-10 09:49 AM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Feedback to Closed

seems meanwhile somehow it was fixed.

#3 - 2017-05-01 01:21 AM - Giovanni Manghi

The "ftools" category is being removed from the tracker, changing the category of this ticket to "Processing/QGIS" to not leave the category orphaned.
